

One AI employee. One monthly fee.

Flat £5,000/month. Live in 48 hours. Managed outcome, not a chatbot.

Price: £5,000/month. 48-hour delivery. Outcome-based, not tool-based.

I deploy an AI worker into your existing channel — Slack or Telegram — that owns one defined body of work. You measure output, not usage. No hiring. No HR. No sick leave.

Internal strategy · VERIFIED 2026-07-29

Live: <https://alkarinearchitect.github.io/ai-employee/>

Call: <https://beacons.ai/humanarchitect>

We refuse to accept avoidable admin cost.

Most UK SMBs bleed money on tasks humans do badly at 3am, on holidays, or under pressure. These are not strategy tasks — they are repetitive loops.

“The agent is leverage. You are still the architect.”

The market is early. The margin runs around 90%. The moat is fulfillment — not the model.

The wound is small, daily, and visible.

Staff spend 10–20 hours a week on intake, follow-up, notes, or admin that needs consistency, not judgement.

- Missed enquiries: after-hours leads go elsewhere.
- Slow quotes: trade jobs lost to faster responders.
- No-shows: clinic or coach time disappears.
- Onboarding drag: agencies lose kickoff weeks to asset chasing.

These leaks are not dramatic. They are daily. That is why they never get fixed.

Outcome ownership, not tool deployment.

- 1 · Foot-in-the-door: £999 audit surfaces the highest-ROI task.
- 2 · One agent, ONE job — the task with the most obvious payback.
- 3 · Price flat at £5,000/month, all usage, all updates included.
- 4 · Ship by day two after agreement + platform token.
- 5 · Prove outcome fast. Use client language, not AI language.

Speed wins. If you lead with AI, you lose. Lead with outcomes.

Why £5,000 is easy to justify.

Every objection collapses when you measure hours, leads, or outcomes.

- $2 \text{ hrs/day} \times £40/\text{hr} = £2,400/\text{month}$ before mistakes.
- $20 \text{ missed leads/month} \times £3,500 \text{ commission} = £21,000/\text{month}$ leak.
- $1 \text{ recovered emergency job/week} > £5,000$ within 6–10 weeks.

Lead-value rule: the AI employee either pays for itself or misses target.

PROOF POINTS

Verified operators, exact claims.

Source	Claim	Date / context
Nick Vasilescu / Corey Ganim	\$5K/mo + fulfillment model	podcast + recap Jun 2026
Linara Bozieva / Business Insider	27 agents, 5 clients, ~2 hrs/week oversight	post eBay layoff, 2026
Boon Media / case studies	Barber no-shows 18%→4%; freight quote response 45min→5min	live page

Attribution note: the \$5K/mo fulfillment quote originates from Corey Ganim's recap of Nick Vasilescu — do not use unauthenticated.

Standard opener. No custom until proven.

- Discovery call: one question — "What task drains your team every day?"
- Audit: map exact workflow + current tool stack.
- Scope: ONE agent, ONE outcome, ONE integration channel.
- Build: SOUL.md + knowledge vault + process map.
- Onboard: introduce into the client's Slack/Telegram with live example.

Do not scale until the first agent delivers by day 14.

Your edge: self-hosted.

Part	Reference paid	Self-hosted free
Computer	Orgo	VPS / container
Harness	OpenClaw/Hermes	Hermes Agent
KB	Fresh vault	~/vault Obsidian
Watch	Latitude	Cron → Telegram

Avoid Orgo/Composio/AgentMail/AgentPhone/Latitude/Honcho unless explicitly approved.
The paid stack is a sales hook, not a requirement.

Churn reduction mode.

Once the agent runs, show the client how to resell access to THEIR customers. That changes churn psychology.

- They become less likely to cancel because it becomes revenue infrastructure.
- They become a case study.
- They introduce you to peers in the same vertical.

Do not sell an AI employee. Sell a margin loop they can resell.

Reduce risk before reducing price.

- Fixed scope: one task per agent, one outcome.
- Fixed channel: one Slack or Telegram thread.
- Fixed deadline: live by day two after handoff.
- Fixed metric: what “done” looks like in 30 days.

If it misses the agreed target by day 30, partial refund.

Close from the first touch.

“The risk is not testing one AI employee for one month. The risk is continuing to bleed margin on a task that does not require a human.”

“If I could [exact outcome] in 48 hours at £5,000/month, which side of this are you on?”

Next action is a fixed call, not a vague follow-up.

One next step.

Primary booking: beacons.ai/humanarchitect

Offer site: alkalinearchitect.github.io/ai-employee/

“One agent. One workflow. One outcome.”

The ask.

This is not a product demo. This is an invitation to a conversation about whether one defined body of work in your business could be owned by an AI employee — managed, monitored, and improved by us.

Next action: one 20-minute call. Not a pitch. A diagnosis.

Book at beacons.ai/humanarchitect or reply to this deck with your worst task. I will reply with a 90-second scoping note.
