

OWL

FOR ARSENAL FIRST TEAM

APPLIED AI ENGINEER

Embedded with Men's First Team Analysis.

Builds, deploys, and supports — 48 hours.

AUGMENTATION, NOT REPLACEMENT.

THE PROBLEM

The gap between analysis need and engineering delivery costs wins.

- 01** ENGINEER SHORTAGE — Hard to hire applied ML engineers who understand football.
- 02** MANUAL GRIND — Analysts repeat pulls, wrangling, and reporting instead of analysing.
- 03** SLOW INSIGHTS — Tactical questions unanswered by matchday press conference.
- 04** FRAGMENTED DATA — Scouting, medical, tracking, and video stuck in silos.

WHY OWL OVER A RESEARCH ENGINEER

Same build capability. Lower cost. Zero recruiting delay.

RESEARCH ENGINEER	
COST	£45-65K/year + benefits + 1 month flat fee
DEPLOY TIME	6-10 weeks hire + 4-8 weeks onboarding
SCHEDULE FLEX	Monday-Friday, off days, no matchday
CONTEXT LOSS	High — holiday, sickness, turnover
OUTPUT	Human-limited batch work

DESIGN AND DEVELOP FU

Production-grade internal products for the Men's First Team.

- > End-to-end data-driven applications for analysts and coaches.
- > Efficient, reliable, scalable interfaces for football workflows.
- > React/TypeScript frontends with Python/SQL backends.
- > Schema-aligned exports from Opta, tracking, video, and scouting.

STREAMLINE CRITICAL PR

Full-stack engineering plus applied ML, aimed at real football tasks.

- > Automate repetitive analysis tasks: tagging, clipping, reporting.
- > Applied ML for event detection, player tracking, and pattern recognition.
- > Reduce analyst workload so they focus on interpretation, not wrangling.
- > Ship proven automation in days, not quarters.

COLLABORATE WITH FOOTBALL

Deep process understanding before any code.

- > Work directly with analysts to understand real workflows.
- > Proactively plan and implement technical solutions.
- > Augment, refine, and improve existing processes.
- > Available around training and matchday schedules.

APPLIED AI SPECIALIST

Subject matter expert at the intersection of AI and football analysis.

- > Drive adoption of state-of-the-art AI in coaching workflows.
- > Identify new applied research opportunities.
- > Translate coaching needs into production systems.
- > Bridge the gap between analysts and engineers.

MAXIMISE RESEARCH IMP

Every build grounded in coaching need, every output matchday-ready.

- > Ensure research is grounded in concrete coaching and analysis needs.
- > Account for real-world constraints: time, data quality, staff availability.
- > Deliver dashboards and briefings that coaches actually use.
- > Measure impact by decision speed and consistency, not paper metrics.

THE STACK

Exact match to the Research Engineer requirements.

- > PYTHON / SQL / JS: Python backend, SQL pipelines, React/TypeScript frontends.
- > PYDATA: numpy, Pandas/Polars, matplotlib/seaborn/Altair.
- > APPLIED ML: End-to-end applied ML for football tasks.
- > DEEP LEARNING: PyTorch, JAX, TensorFlow for event and pattern models.
- > COMPUTER USE: Operates software, fills forms, generates reports.
- > MESSAGING: Telegram, iMessage, Slack for analysts and coaches.

FOOTBALL USE CASES

Built for the Men's First Team Analysis department.

- > **MATCH ANALYSIS:** Post-match insight cards within 60 minutes.
- > **SCOUTING SHORTCUTS:** Automated tagging, clip search, opponent profiles.
- > **PERFORMANCE BRIEFS:** Weekly readiness and load digests for coaches.
- > **SET-PIECE DESIGN:** Corner/free-kick threat maps by zone.
- > **STAFF SUPPORT:** Telegram/iMessage/Slack bot embedded with analysts.

48-HOUR DEPLOYMENT

From kickoff to live briefing. No recruiting delay.

0-4H Access provisioning: data exports, video, schemas.

4-12H Schema mapping and club-specific alignment.

12-24M Warm-start on last season data.

24-36M Validation against known fixtures.

36-48G Go-live. First briefing card sent.

INTEGRATION

Adapts to training and matchday schedules.

- > TELEGRAM / iMessage: Threaded comms with analysts and coaches.
- > SLACK: Embedded support in existing channels.
- > EMAIL: Digest and alert distribution.
- > VOICE: Fast outbriefs when text isn't enough.

PROOF

Verified public signals only.

- Managed AI employee model is live. Confirmed client revenue.
- Agent builds and onboards client systems autonomously.
- Customer support runs without human intervention.
- Stack proven: agent mail, phone, card, observability, vault.
- B2B2B path proven: resell lowers churn.

WHAT OWL WON'T DO

- Replace the Head of Analysis or coaching staff.
- Guarantee match outcomes without data and staff buy-in.
- Operate without secure access to exports.

PRICING

Three models. Same outcome.

SINGLE TEAM

£5,000 / month

One team. One workflow.

CLUB / ORG

£12,000 / month

Multiple departments. Shared agent.

RESELL / WHITE-LABEL

£8,000 / month + 20% rev share

You sell it. We run it.

SECURITY

Enterprise posture from day one.

- Dedicated environment per client. No shared tenants.
- Encryption at rest and in transit.
- Role-based access. Audit log for every agent action.
- PII and performance data never used outside your environment.

SUPPORT

Real humans behind the agent.

- Named success contact.
- Weekly delivery review with analysts.
- Same-day critical fix SLA.
- Knowledge capture from every interaction.

IN SCOPE

What we own together.

- Data ingestion from existing club exports.
- Model deployment, tuning, and validation.
- Insight delivery into existing comms channels.
- Weekly improvements driven by real requests.

OUT OF SCOPE

What stays with your staff.

- Final coaching decisions.
- Medical clearance and player welfare calls.
- Purchasing new data sources or hardware.
- IR and PR communications.

TERMS

Simple, non-binding starter terms.

- Minimum term: 3 months.
- Exit: 30-day notice after minimum term.
- IP: client owns data and outputs; OWL owns the system.
- Price lock: guaranteed for the first 12 months.
- Application deadline response within 48 hours.

NEXT STEP

Application closes Thursday 6th August 2026.

We reserve the right to close early if volumes are high.

Get your application in sooner rather than later.
