

OWL for Sports Teams

Managed AI Engineer

Your forward-deployed engineer.

Builds, automates, and supports — 48 hours.

Augmentation, not replacement.

The Four Pain Points

Every sports team bleeds money on the same four bottlenecks:

1. Talent Gaps

Analysis staff shortages create blind spots

2. Manual Grind

Hours lost to repetitive data pulls, wrangling

3. Slow Insights

Tactical questions unanswered long after

4. Fragmented Data

Scouting, medical, and performance data

What OWL Actually Does

- Automates ETL and repetitive quantification so analysts can focus on strategy.
- Builds full-stack analytics applications on top of your existing data.
- Develops applied ML models grounded in coaching questions and academic papers.
- Ships dashboards and visualizations faster than any human analyst.
- Operates as a permanent embedded analyst. No benchmarking or notice period.

OWL does not replace your analysts. It gives them superpowers.

The Stack

Python

PyData: NumPy, Pandas, scikit-learn. xG pipelines, tracking-data ETL.

SQL

Match event stores, player-wearable joins, scouting-dossier data.

JavaScript / TypeScript

Web dashboards, coaching portals, live-match apps.

Data Visualization

Expected-threat maps, transition heatmaps, passing-lane diagrams.

Full-Stack Development

Production apps built and shipped inside your environment.

Computer-Use + Messaging

Automates browser actions. Connects to Telegram, iMessage, and Slack.

Five Real Sports Applications

1.

Pre-match opposition scouting and probability maps

2.

In-game transition and passing-lane heatmaps

3.

Player load monitoring and injury-risk trend detection

4.

Transfer / scout similarity and assessment engines

5.

Automated coaching-portal dashboards and daily reporting

48-Hour Deployment

Ship by Friday. Train Monday. Win by matchday.

How OWL Connects to Staff

Telegram

Real-time alerts and on-demand queries.

iMessage

Daily automated reports delivered to phones.

Slack

Team channels, ops channels, coaching-portal updates.

Zero training. Staff already know the apps.

Proof

Cline

8M+ installs

Open-source coding agent. Validates demand.

Dewey Model

\$5K/mo

Managed AI employee. Agent builds agent.

agentmarketcap.ai

60-80% margins

\$200-500/mo delivery cost. Near-zero overhead.

Solo-founder trend

36.3%

Market trusts one-person agent businesses.

Pricing

Single Team

£5,000/month

- One managed OWL instance
- Embedded with one team
- Standard integrations
- Weekly optimization

Club / Organization

£12,000/month

- Multi-department access
- Priority deployment queue
- Custom skills stack
- Dedicated ops review

Resell / White-Label

£8,000/month

- Your brand, OWL underneath
- 20% revenue share
- Managed rollout support
- Optional add-ons included

All plans include: 48-hour deployment | Embedded access | Telegram/Slack/iMessage s

Price in GBP. No setup fees. Upgrade or downgrade quarterly.

Stop Hiring. Start Embedding.

OWL is live.

Your team can embed a managed AI
engineer this week.

- Only 3 Club/Organization slots left for Q3.
- Next Single Team cohort starts Monday.
- Lock your price before Q4 launch.
