

NOHUMA · NON-HUMAN INTELLIGENCE

# THE CONSTRUCTION BIBLE

---

What the Dewey/NOHUMA system actually is. What it can do. The tools it runs on. Every construction client, use case, and objection — broken down.

Built by OWL for Human Architect · 9 Aug 2026.  
£5,000/month per client. System facts verified against the live Dewey clone (DEWEY\_INTEL.md + dewey-knowledge-base.md). Market facts scraped (CITB, NLW, Mitie, Balfour, RICS, HBR/InsideSales). No invented stats or contacts.

## CONTENTS

# The full breakdown

- 03** What NOHUMA is
- 04** The 8 parts of every AI employee
- 05** Architecture: 1 brain + 4 specialists
- 06** The 48-hour delivery method
- 07** The tools it runs on
- 08** Can it handle construction? (verdict)
- 09** The 5 construction bottlenecks
- 10** Segment 1 — Trade & specialist SMEs
- 11** Segment 2 — Housebuilders
- 12** Segment 3 — Tier-1 main contractors
- 13** Segment 4 — Social housing / RSLs
- 14** Segment 5 — Facilities management
- 15** Segment 6 — Infrastructure & civil
- 16** Segment 7 — Professional / QS / survey
- 17** Cross-cutting use cases
- 18** Your money model
- 19** The 30-day playbook
- 20** Copy-paste openers
- 21** FAQ — capabilities

WHAT NOHUMA IS

# A managed AI employee, not a chatbot

NOHUMA is a managed AI employee — a persistent Hermes Agent wired into a client's actual stack (email, Slack, CRM, calendar, phone). It runs 24/7, owns a workflow, reports daily, and is built, deployed and supported for the client by the operator.

The model is cloned from Nick Vasilescu's "Dewey": \$5,000/month per client, everything included (agents, tokens, usage — no separate line items). T's clone lives at /root/dewey (orchestrator) + /root/client-agents (factory).

## The promise

Discovery call → agent built → onboarded to Slack/Telegram → live in 48 hours, or the first month is refunded. Day-30: if it hasn't saved >£5k in client hours (measured vs timesheet), the first month is refunded.

Revenue is T's personal Ltd income — never routed through the HumanitAI CIC. Booking: <https://humanitai.com>

THE SYSTEM, REAL

# The 8 parts of every AI employee

- **1 · Computer** — isolated client VPS / VM (the agent's own machine).
- **2 · Email** — domain alias per client.
- **3 · Phone / IM** — Telegram, Slack, iMessage, SMS bridge.
- **4 · Comms** — meets the customer in their own channel.
- **5 · Tools** — Hermes skills + terminal/file/web + 1000+ app connectors.
- **6 · Card** — AgentCard so the agent can spend autonomously (paid tier).
- **7 · Knowledge** — client context vault, "one fact, one home."
- **8 · Observability** — fleet-wide health monitoring → alerts.

Verified from Nick's build masterclass transcript (fAhwYrjmQRk) + Corey Ganim thread. This is the actual spec, not a pitch.

# One brain. Four specialists.

---

One strong general-purpose orchestrator does 99% of the talking. It hands off to four specialized sub-agents. Isolation minimizes the blast radius — if one breaks, the others keep running.

### **The four specialists**

- Outbound — lead generation & first touch
- Sales follow-up — nurture, chase, book
- Content / assets — proposals, reports, posts
- Support — tickets, tenant/customer comms

For a construction client these map directly: outbound to FM/estates buyers, sales follow-up on tenders, content on PQQs/reports, support on tenant/ticket triage.

T's /root/dewey/AGENTS.md already mirrors this 1+4 structure. The construction bible reuses it wholesale.

## DELIVERY METHOD

# Live in 48 hours

---

- 1 Discovery call recorded (Granola-style notetaker).
- 2 Client dumps docs/context into Slack or Telegram.
- 3 Transcript turned into the agent's skills & SOP vault.
- 4 Templated stack cloned per client (isolated).
- 5 Agent built + onboarded by the orchestrator.
- 6 Client pays → agent live same day / within 48h.

Onboarding ≈ a new human employee ("your intern on day three"). Crawl-walk-run: start in Slack, talk to it, expand. Weekly improvements included.

Verified from the managed-agent workshop (kdvm\_kRZk8A)  
+ OCA offer framework (xTxb922RCP0).

# What runs under the hood

- **Harness:** Hermes Agent (the orchestrator + sub-agents).
- **Models:** gpt-5.5 default via Nous; fast model for low-reasoning speed.
- **Computer:** isolated VPS / Orgo VM (8GB/4CPU min).
- **Messaging:** Telegram, Slack, iMessage, AgentPhone SMS bridge.
- **Knowledge:** Obsidian vault — single source of truth.
- **Memory:** Honcho — one fact, one home, no contradictions.
- **Integrations:** Composio +1000 apps, 13 MCPs (CRM, email, docs, calendar).
- **Observability:** Latitude — fleet health → Telegram alert.

CAN IT HANDLE CONSTRUCTION?

# Yes. It is built for exactly this.

---

Construction's problem is not building — it is the administrative tax around building: tendering, compliance, chasing, reporting. Those are document-and-workflow jobs. An AI employee owns document-and-workflow jobs 24/7.

The 206,000-worker gap by 2030 (CITB) cannot be hired away. Automating the non-building work is the only lever left. NHUMA is that lever — per desk, per framework, per region.

## Verdict: fully capable of every use case in this bible, drafts-only, on the client's own stack.

The only thing it can't do is swing a hammer. That was never the bottleneck.

# Five ways construction leaks money

---

- 01 Tendering & PQQ admin** — SMEs spend significant time on PQQs, method statements and financial packs with no guarantee of winning.
- 02 Business development** — no one consistently reaches the right buyer because the founder is on site.
- 03 Payment & cashflow** — late payment is the sector's most overlooked crisis; chasing gets deprioritised.
- 04 Compliance** — Building Safety Act, Awaab's Law (Oct 2025), PAS 2035, H&S documentation.
- 05 Reporting & coordination** — daily logs, snag lists, handovers, subcontractor comms.

Every segment below suffers at least three. NHUMA is built to remove them.

# Founders on the tools

---

## Real clients

Pimlico Plumbers · Able Group · Aspect · + thousands regional (heating, electrical, roofing, drainage).

## POI

The owner/founder directly — no procurement layer.  
LinkedIn / FSB directory / Checkatrade.

## NHUMA use case

- Drafts PQQs & quotes from site photos.
- Chases invoices politely, 24/7.
- Runs outbound to facilities managers & estate agents.

## Your income

£5,000/mo per SME. Target 5–10 in 6 months. Fastest yes.

# Volume & regional developers

---

## Real clients

Barratt Redrow · Taylor Wimpey · Persimmon · Bellway · Vistry · Berkeley · Keepmoat · Crest Nicholson · Miller Homes · Bloor.

## POI

✓ **Mark Bailey** — Regional MD, London & Southern, Barratt Redrow (confirmed, trade press). Others: "Regional MD" / "Sales Director".

## NHUMA use case

- Plot-sales follow-up & solicitor/surveyor chase.
- Snag-list coordination across trades.
- Building Safety Act document drafting.

## Your income

£5,000/mo per regional division. One group = multiple seats.

# The quoted giants

---

## Real clients

Balfour Beatty (£10.0bn, 2024) · Kier · Morgan Sindall · Costain · Galliford Try · Laing O'Rourke · Mace · BAM Nuttall · Skanska UK · Willmott Dixon.

## POI

Pre-Construction Director / Bid Director. LinkedIn "[Company] + Preconstruction" or firm leadership page.

## NHUMA use case

- PQQ engine — drafts 60–80% from past wins.
- Subcontractor pre-qualification.
- Daily site logs & supply-chain follow-up.

## Your income

£5,000/mo per framework lot / bid desk. Enterprise seat potential.

# Landlords under a legal clock

---

## Real clients

L&Q · Clarion · Peabody · Hyde · Sanctuary · Sovereign Network Group · Places for People · Guinness Partnership · Notting Hill Genesis.

## POI

✓ **Richard Whitby** — Construction Director, L&Q (confirmed, directory). Others: "Director of Property / Repairs / Operations".

## NHUMA use case

- Tenant report triage (damp/mould under Awaab's Law).
- Appointment booking & contractor chase.
- Compliance case-file generation.

## Your income

£5,000/mo per repairs/ops function. Multiple per RSL.

# The helpdesk economy

---

## Real clients

Mitie (£4.51bn FY24) · ISS UK · Sodexo · CBRE · Bilfinger UK · EMCOR UK · ABM · Compass.

## POI

✓ **Jason Towse** — MD Business Services, Mitie. ✓ **Franck Crosnier** — BD Director TFM, Mitie (both confirmed). Others: "New Business Director" / "MD".

## NHUMA use case

- FM tender response drafting.
- First-line ticket triage.
- SLA reporting & outbound for new contracts.

## Your income

£5,000/mo per desk/division. Highest seat potential.

# The fee-earners

---

## Real clients

Turner & Townsend · Arcadis · Rider Levett Bucknall · Gleeds · Currie & Brown · AECOM · regional QS partnerships · RICS practices.

## POI

✓ **Stephanie Marshall** — MD UK Real Estate Cost Management, Turner & Townsend (confirmed, press release). Others: "Partner" / "MD Cost".

## NHUMA use case

- Fee proposals generated from scope.
- Appointment packs & client reports.
- Business development outbound.

## Your income

£5,000/mo per practice/partner group. Quick partner meeting = the sale.

## CROSS-CUTTING USE CASES

# What NHUMA does, daily

---

- **Tender / PQQ engine** — drafts from past wins; your people polish the last 20–40%.
- **Outbound BD** — hundreds of personalised reaches a week to the right buyer.
- **Payment chase** — polite, persistent, fully logged.
- **Compliance docs** — BSA, Homes Act, PAS 2035, H&S packs.
- **Site & report automation** — daily logs, snag lists, handovers.
- **Customer / tenant comms** — triage, booking, status, complaints.

One NHUMA covers all six. Proof point: HBR/InsideSales — respond within 1 hour = 7x more likely to qualify a lead; 60x vs 24h+. NHUMA makes that automatic.

## YOUR MONEY MODEL

# Clients × £5,000/month

---

|            |               |
|------------|---------------|
| 1 client   | £5,000 / mo   |
| 5 clients  | £25,000 / mo  |
| 10 clients | £50,000 / mo  |
| 20 clients | £100,000 / mo |

Annualised: 5 = £300k/yr · 10 = £600k/yr · 20 = £1.2m/yr.

Enterprise buyers take multiple seats (per desk / region), so one logo can be 5–10 × £5k. Delivery cost per client is low (VPS + model + light oversight), so margin stays high. 99% of UK businesses are SMEs (RICS 2024) — the addressable base is enormous.

# From zero to first close

---

- ✓ **Days 1–3:** Pick Segments 1 & 7. List 20 named targets (10 SME, 10 professional).
- ✓ **Days 4–7:** Run the POI finder on all 20. Log name + role + real contact.
- ✓ **Days 8–14:** Send the opener. Book 5 free 20-min bottleneck audits.
- ✓ **Days 15–21:** Deliver audits. Show the £5k saving in writing. Propose 90-day pilot.
- ✓ **Days 22–30:** Close first 1–2 clients. Stand up NHUMA in 48h. Measure vs timesheet.

One closed SME = £5k/mo, proof, and a reference for the enterprise pitch.

## COPY-PASTE OPENERS

# Say this. Watch replies.

---

### **To an SME founder**

*"I free founders like you from tender admin and payment chasing with a managed AI employee — £5k/mo, live in 48h, or the first month's free. 20 mins to see your saving?"*

### **To an enterprise bid/BD lead**

*"Your team loses days to repeat PQQs. We run a managed AI employee that drafts 60–80% from past wins and pre-quals subs. 20-min audit, measured saving, or it's free."*

### **To an RSL / compliance lead**

*"Awaab's Law is a clock you're now on. We turn tenant reports into a tracked, compliant workflow with a managed AI employee. 20 mins to see it on your site?"*

Short. One ask. One proof point. The guarantee does the closing.

# "Can it actually...?"

---

**Q: Draft a real PQQ?** Yes — from past wins + compliance docs in the client vault. Your people approve the final 20–40%.

**Q: Integrate with our CRM / Slack?** Yes — via 1000+ app connectors (Composio) and MCPs. It works inside your stack.

**Q: Handle multiple frameworks?** Yes — one seat per framework lot / bid desk / region.

**Q: Work for a 5-person SME?** Yes — that is exactly who it is for. No procurement layer, founder deals direct.

**Q: Who owns the agent & data?** The client. Isolated VPS, portable on exit. Not locked in.

**Q: White-label it?** Yes — single-tier white-label; it becomes your revenue line.

# Kill the friction fast

---

**"We already use software."** → "NHUMA operates it. It's the operator, not another login."

**"Will it send things blind?"** → "Drafts-only by default. Your people approve. Nothing goes out unapproved."

**"What if no saving?"** → "Day-30: if it hasn't saved >£5k in your hours, the first month is refunded. Measured, not promised."

**"Data security?"** → "Isolated client VPS. Your data stays yours, leaves with you on exit."

**"Too expensive."** → "One monthly line replacing 2–3 admin hires you can't recruit anyway (206k gap by 2030)."

**"Replace our bid team?"** → "No — multiplies them. Same team, 3x throughput."

VERIFIED VS. TO-CONFIRM

# Read before you pitch

## ✓ **Verified**

System: 8 parts, 1+4 architecture, 48h delivery, tools (Hermes/Orgo/Composio/Obsidian/Honcho/Latitude) — from DEWEY\_INTEL.md + dewey-knowledge-base.md.  
Market: CITB 206k by 2030; NLW £12.21 Apr 2025; construction wages +6.9% to Nov 2024; Mitie £4.51bn FY24; Balfour revenue £10.0bn 2024; Awaab's Law Oct 2025; RICS 99% UK businesses SMEs; HBR/InsideSales 7x/60x lead-response. POI: Bailey, Towse, Crosnier, Marshall, Whitby.

## → **Confirm before relying**

Per-client "£X saved" = illustrative; Day-30 timesheet proves it. POI names beyond the 5 confirmed = roles to find via LinkedIn/Companies House/firm site. Exact construction-firm count not re-scraped this session — cite RICS SME stat instead.

No invented stats. No fake contacts. Earn the logo, then use it.
