

NOHUMA · NON-HUMAN INTELLIGENCE ·
SWARM-ANALYSED

UK CONSTRUCTION TARGET OS

Seven real segments. Named companies with sourced facts. Confirmed buyers. Every bottleneck mapped to what NHUMA does. Plus a prioritisation matrix and objection library.

Built by OWL after a 3-agent parallel swarm analysis (2026-08-09). £5,000/month per client. System facts from DEWEY_INTEL.md. Market & company facts web-sourced this session and cited. No stats or contacts invented — unverified items are marked.

THE SWARM VERDICT

Two lanes. Run them at once.

Cash engine: Segment 1 (Trade SME) + Segment 7 (Professional). Shortest cycle, funds the business, builds proof.

Beachhead: Segment 4 (RSL). The only segment with a dated statutory forcing function already live — Awaab's Law (27 Oct 2025). Turns "nice AI" into "compliance cost avoidance."

Land-and-expand: Segment 5 (FM) → Segment 3 (Tier-1). Thin margins + relentless bid volume = easy ROI math.

Deprioritise for now: Segment 6 (Infrastructure). Highest procurement friction, longest cycle, worst fit for a 48h/Day-30 guarantee.

Shortest cycle $\neq$ highest value. 1+7 pay the bills; 4+5 build the business; 3+6 are 6–12 month plays.

PRIORITISATION MATRIX

Where to spend the week

Seg	Name	Speed to close	Seat / expand
1	Trade SME	Fastest	Lowest
2	Housebuilders	Fast–med	Med–high
3	Tier-1	Slowest	Highest
4	RSL	Medium	High
5	FM	Med–slow	High
6	Infra	Slowest	High (slow)
7	Professional	Fast	Low–med

Run now: 1+7 (cash) + 4 (beachhead). Nurture in parallel: 5 → 3.

Park: 6. This is analytical judgement, not a sourced stat.

Six closes, one guarantee

"We use Procore / Causeway / Bidhive." → NHUMA feeds them. Those are systems of record; NHUMA is the labour that fills them — no migration.

"Data security / can't put data in AI." → Drafts-only, nothing leaves without a human, scoped to a locked subset on day one; expand after InfoSec signs off.

"Will it send blind?" → No. Hard product constraint: every output lands in a human queue for approval.

"Too expensive." → Less than a junior bid coordinator, works nights/weekends, Day-30 guarantee = you risk nothing.

"Not replacing our bid team." → Good. NHUMA does the first draft + chasing so your team owns win themes.

"What if no saving?" → Two guarantees: not live in 48h = refund; not >£5k saved by Day 30 = refund. We agree the measure first.

Per-client "£X saved" = illustrative; Day-30 timesheet proves it. POIs beyond the 5 confirmed = ROLES to find (LinkedIn/Companies House/firm site). VolkerWessels UK & Sir Robert McAlpine exact turnover, Ofwat AMP8 £-figure, National Highways RIS3 primary source, Cala/Weston/G&T revenues — not cleanly resolved this pass; do not cite as exact. Mitie FY25 £5.09bn (theaccounts.uk) vs FY24 £4.51bn both real, different years.
