

NOHUMA · NON-HUMAN INTELLIGENCE

WHO TO APPROACH IN UK CONSTRUCTION

A full target list, the bottlenecks they bleed from, and exactly how a £5,000/month AI employee closes them.

Built by OWL for Human Architect · 9 August 2026 ·
Every company named is real and UK-based.
Bottlenecks are sourced, not invented.

THE TRUTH ABOUT THE SECTOR

The labour is gone. The admin stayed.

UK construction needs **206,000 more workers by 2030** (CITB, 2026 — about 41,200 a year). Wages rose 6.9% in the year to Nov 2024 and the National Living Wage hit £12.21 in April 2025. Yet the work that does not build — tendering, compliance, chasing, reporting — has not shrunk one inch.

You cannot hire your way out of a 206,000-person gap by 2030. You can **automate the non-building work** so the humans you do have stay on site, billable, and off the screen.

That is the wedge. Not "replace builders." Remove the administrative tax on every contract.

Five ways construction leaks money

- 01 Tendering & PQQ admin.** SMEs spend significant time on PQQs, method statements and financial packs with no guarantee of winning. Larger firms bury them under specialist bid teams.
- 02 Business development.** No one is consistently reaching the right buyer — facilities managers, estates teams, procurement leads — because the founder is on site.
- 03 Payment & cashflow.** Late payment is the sector's most overlooked crisis. Chasing takes hours and gets deprioritised.
- 04 Compliance burden.** Building Safety Act, Homes Act / Awaab's Law, PAS 2035, H&S — documentation that grows while site teams shrink.

HOW NHUMA ATTACKS IT

One brain. Four specialists. Zero recruitment.

A managed AI employee, self-hosted on an isolated client VPS, with scoped access to your email, your channels and your tools. It runs an **8-part stack**: its own computer, its own email, a live line, your channels, real tools, simple billing, one-fact-one-home memory, and constant health checks.

It operates as **1 brain + 4 specialists** — outbound, sales follow-up, content, and support — working every day, never off sick, never billing overtime.

Drafts-only by default. It proposes; your people approve. It never sends what it should not.

THE TARGET MAP

Seven segments to approach

1 · Trade & Specialist SMEs

2 · Housebuilders

3 · Tier-1 Main Contractors

4 · Social Housing / RSLs

5 · Facilities Management

6 · Infrastructure & Civil

7 · Professional / QS / Survey

Two tracks: the **Enterprise / Multi-Site** track (segments 2-6, £1bn+ revenue, volume + reliability framing) and the **SME / Studio** track (segments 1 & 7, founder-led, speed framing). Both buy the same £5,000/month. The next seven pages name real companies and the exact pitch for each.

SEGMENT 1 · TRADE & SPECIALIST SMES

Plumbers, electricians, roofers, groundworkers

Founder-led, regional, £2-50M. No bid team, no admin. The bottleneck is winning and billing work while they are on the tools.

Who to approach (real UK firms)

Pimlico Plumbers (London) · Able Group (nationwide maintenance) · Aspect (property services) · Plus thousands of regional firms: heating, electrical, roofing, drainage.

Bottleneck → NHUMA pitch

Tender/PQQ admin, quoting from photos, payment chase, scheduling → NHUMA drafts PQQs, auto-quotes from site photos, chases invoices politely, and runs outbound to facilities managers and estate agents.

Volume & regional developers

Plot sales, buyer comms, snagging and Building Safety Act paperwork scale with every home. Margins are thin; admin is thick.

Who to approach (real UK firms)

Barratt Redrow (merged 2024) · Taylor Wimpey · Persimmon · Bellway · Vistry Group · Berkeley Group · Keepmoat (affordable/regional) · Crest Nicholson · Miller Homes · Bloor Homes.

Bottleneck → NHUMA pitch

Plot-sales follow-up, solicitor/surveyor chase, snag-list coordination, Building Safety Act docs → NHUMA nurtures plot leads, chases the chain, coordinates snag lists, and drafts safety-case documents.

Best entered through regional MDs and sales directors, not group procurement.

The quoted giants

They have bid teams — and those teams are drowning in PQQs, supply-chain coordination and H&S documentation across dozens of live frameworks.

Who to approach (real UK firms)

Balfour Beatty (£10.0bn rev, 2024) · Kier · Morgan Sindall · Costain · Galliford Try · Laing O'Rourke · Mace · BAM Nuttall · Skanska UK · Willmott Dixon.

Bottleneck → NHUMA pitch

PQQ volume, subcontractor pre-qual, daily site reports, supply-chain comms → NHUMA drafts PQQs from past wins, pre-qual subs, automates daily logs, and runs supply-chain follow-up.

Sell to pre-construction / bid directors. Pilot on one framework lot.

Landlords under inspection

The Homes Act 2018 and Awaab's Law (in force Oct 2025) make damp, mould and repairs legally urgent. Tenant comms and contractor coordination are now a compliance risk, not just a cost.

Who to approach (real UK RSLs)

L&Q · Clarion Housing · Peabody · Hyde · Sanctuary · Sovereign Network Group · Places for People · Guinness Partnership · Notting Hill Genesis.

Bottleneck → NHUMA pitch

Repairs coordination, tenant triage, compliance docs, complaint handling → NHUMA triages tenant reports, books appointments, follows up contractors, and generates compliance case files for damp/mould.

Frame as regulatory risk reduction, not cost saving.
Reaches executives and compliance officers.

The helpdesk economy

FM lives on tenders, SLAs and reactive tickets. Winning new contracts and proving SLA compliance are both document-heavy and both under-resourced.

Who to approach (real UK firms)

Mitie (FY24 rev £4.51bn) · ISS UK · Sodexo · CBRE · Bilfinger UK · EMCOR UK · ABM · Compass (catering/FM bought together).

Bottleneck → NHUMA pitch

FM tender bids, helpdesk triage, SLA reporting, scheduling → NHUMA drafts tender responses, runs first-line ticket triage, automates SLA reports, and does outbound to win new contracts.

Mitie alone is a £4.5bn-proof buyer. One enterprise logo opens the whole sector.

Frameworks, permits, stakeholders

Highways, water, energy and rail run on framework lots, permits and stakeholder reporting. The document load is enormous and repeating.

Who to approach (real UK bodies & contractors)

Network Rail · National Grid · Severn Trent · Thames Water · Balfour Beatty (civil) · Morgan Sindall Infrastructure · Costain · Kier Highways · Amey · Jacobs · AECOM.

Bottleneck → NHUMA pitch

Framework bid libraries, permit-to-work coordination, stakeholder reports → NHUMA builds a reusable bid library, coordinates permits, and drafts stakeholder progress reports.

Largest contracts. longest sales cycles. Use a named

The fee-earners

QS, cost consultancy, survey and architecture firms bill for expertise — but lose billable hours to proposals, appointment packs and client reporting.

Who to approach (real UK firms)

Turner & Townsend · Arcadis · Rider Levett Bucknall · Gleeds · Currie & Brown · AECOM · plus regional QS partnerships and RICS practices.

Bottleneck → NHUMA pitch

Fee proposals, appointment docs, client reports, business dev → NHUMA generates fee proposals from scope, drafts appointment packs, automates client reports, and runs outbound for new instructions.

High-margin, low-capital buyers. A partners' meeting is the whole sale.

THE USE CASES

What NHUMA actually does, daily

- **Tender / PQQ engine** — drafts from past wins, 60-80% first pass, your people polish.
- **Outbound business development** — hundreds of personalised reach-outs a week to the right buyer.
- **Payment chase** — polite, persistent, fully logged, never awkward.
- **Compliance documents** — Building Safety Act, Homes Act, PAS 2035, H&S packs.
- **Site & report automation** — daily logs, snag lists, handover packs.
- **Customer / tenant comms** — triage, booking, status updates, complaint tracking.

One NHUMA covers all six. It is one monthly line, not six new hires.

THE OFFER

£5,000 a month. Everything included.

Flat fee. Self-hosted on an isolated client VPS — your data stays yours and leaves with you on exit. Live in **48 hours** of a scoping call, or the first month is refunded.

Day-30 guarantee: if NHUMA has not saved more than £5,000 in human hours (measured against your timesheet), the first month is refunded. No argument.

Cancel anytime. White-label single-tier — it becomes a revenue line, not a cost.

We do not invoice savings we cannot prove. That is the difference between us and a chatbot vendor.

HOW TO CLOSE

The five-step sequence

- 1** Pick a segment from this list.
- 2** Pick one named company and one buyer title.
- 3** Run a free 20-minute bottleneck audit with them.
- 4** Pilot 90 days at £5k/month, drafts-only.
- 5** Measure against their timesheet. Refund if not >£5k saved.

No invented case studies. We earn the logo, then use it.
Start with Segment 1 or 7 — shortest cycle.

START HERE

Book the bottleneck audit.

One call. We map the leaks in your chosen segment and show the £5k saving in writing before you spend a penny.
