

The standard.

How every NOHUMA asset is built:
palette, type, voice, and the one rule
that overrides all others.

For Human Architect. Updated 2026-08-09. v2.

PALETTE

Near-black. Gunmetal. One violet.

- Background #08080B (never pure #000)
- Panel #0E0E13
- Body #C3C9D2, captions #828990
- Headline #FFFFFF
- Accent #8b5cf6 (violet, the only colour)

No gold. No green. No gradients. No second hue.

TYPE

Inter. Perfect Fourth.

- Font: Inter only. Never Helvetica/Arial.
- Scale locked at ratio 1.333 (Perfect Fourth)
- Body floor 28px. Never smaller.
- Six hierarchy levels minimum per asset

Harmony comes from the ratio, not from taste.

LAYOUT

One idea per spread.

Asymmetric left grid. Massive negative space. Full-bleed 9×12, margin zero. The brand is restraint, not decoration.

VOICE

WHY first. Always.

Simon Sinek's Golden Circle: why, then how, then what. Lead with belief, not the feature. Conviction, not explanation. No em dashes. No AI tells.

THE ONE RULE

Match the site.

Every PDF, deck, and page inherits this palette and scale. If it does not match the live site, it is wrong, regardless of who built it. The brand is one system.
