

HOW IT WORKS

A worker, not a prompt.

The eight parts that turn a model into an employee, and the architecture that keeps it safe.

THE 8 PARTS

- A computer of its own
- An email in the client's name
- A live messaging line
- The client's channels
- Real tools and connectors
- A way to spend
- A knowledge base, one fact one home
- Fleet-wide observability

Miss one and it is a toy. All eight and it is a worker.

THE ARCHITECTURE

One brain. Four specialists.

One orchestrator talks to the client 99% of the time and hands off to specialists: outbound, sales follow-up, content, support. Isolation minimises the blast radius.

WHERE IT RUNS

Self-hosted. Yours.

On your own server, scoped access, data stays yours, portable on exit. We operate it. You own it.

THE INVITATION

Hire a Non-Human Intelligence.

Twenty minutes. One workflow. A one-page scope statement, no obligation.

NOHUMA is a managed Non-Human Intelligence, built and operated in the UK by Human Architect. Self-hosted, your data stays in your environment.
