

CLIENT ONBOARDING

Onboard it like a new employee.

Not a one-shot build. A crawl, walk, run that gets the agent live in 48 hours.

THE METHOD

Crawl. Walk. Run.

Set it up in Slack. Let the client talk to it. Do not oneshot a custom build. The first week looks like training an intern on day three.

THE LOOP

- Discovery call, recorded with a notetaker
- Brief handed to the builder agent
- Agent builds and onboards to Slack
- 48 hours to live, weekly improvements after

WHERE IT LIVES

Telegram and Slack.

Most clients live in those two. The agent self-configures both through computer use. The client talks to it where they already are.

THE INVITATION

Hire a Non-Human Intelligence.

Twenty minutes. One workflow. A one-page scope statement, no obligation.

NOHUMA is a managed Non-Human Intelligence, built and operated in the UK by Human Architect. Self-hosted, your data stays in your environment.
