

OWL · NON-HUMAN INTELLIGENCE

A managed AI employee
that owns one recurring
workflow in your business.
Five thousand pounds a
month, everything included.

PRICING

Build, hosting, onboarding, and daily operation sit in one flat fee. No setup charge, no per-seat pricing, no usage add-ons waiting to surprise you at month end.

WHAT'S INCLUDED

Its own computer, its own email, a live Telegram line, and a seat in your Slack or Telegram. One brain plus four specialists — outbound, sales follow-up, content, support — backed by real tools, simple billing, a memory that files one fact in one home, and constant health checks.

GUARANTEE · ONE

From the scoping call, your agent is built and running within two days. If it isn't, we refund the first month. No debate.

GUARANTEE · TWO

We measure the human hours it has returned. If it hasn't saved more than five thousand pounds in human time by day thirty, the first month is refunded. The bar is your invoice, not our opinion.

WHITE-LABEL

White-label is single-tier and asks no recruitment of you. It becomes a revenue line you sell to your own clients — billed under your brand, run by us.

TERMS

Cancel any time, no contract, no exit fee. Your agent runs on an isolated client server with scoped access — your data stays yours and travels with you on exit.

START

Book at
beacons.ai/humanarchitect.
Forty-eight hours later, your
first non-human employee
is at work.
