

OWL · NON-HUMAN INTELLIGENCE

White-label Owl and turn a
cost you carry into a
revenue line your clients
pay for. Single tier. No
recruitment.

THE MODEL

Your clients see your name, not ours. The Non-Human Intelligence works under your label while we build, host, and run it. One clean option, nothing else to buy.

WHY IT WINS

White-label is single-tier. You add an AI employee to your offer without hiring, training, or managing anyone. It becomes a product on your shelf, not a line on your cost sheet.

THE ECONOMICS

You bill your clients monthly for an Owl you deliver through us. They pay you. We run it. The margin is yours and it renews. The same five-thousand-pound engine becomes your recurring income.

HOW TO START

Book a scoping call at beacons.ai/humanarchitect. We stand up a white-label instance on your brand, live in forty-eight hours. You start selling Non-Human Intelligence under your name.
