

Stop losing the lead you almost had.

Every slow reply,
every missed
message, every
hour of admin is
work you paid
someone to lose.
Owl does it.

A lead cools in the time it takes to finish your coffee.

HBR: firms that reply within the hour are 7x more likely to qualify a lead. 78% buy from the first to respond. Most businesses answer same-day, if at all.

One employee that never stops.

Owl is a managed Non-Human Intelligence that owns one recurring workflow in your business — quotes, follow-up, intake, support. It replies in the first hour. Every time.

One flat fee. Everything built, hosted, run.

01

Its own desk

Computer, email, live
Telegram, your Slack.

02

One brain, four specialists

Outbound, follow-up,
content, support.

03

Live in 48 hours

Or the first month is
free.

04

Day-30 proof

More than £5k saved or
you don't pay.

**£5,000 a month.
That is the whole
invoice.**

No setup. No per-seat. No usage add-ons. One number covers build, hosting, onboarding, and daily operation. The cost of one junior, for a worker that never sleeps.

If it hasn't paid for itself, you don't.

We measure the human hours it returns. If it hasn't saved more than £5,000 in human time by day 30, the first month is refunded. Live in 48 hours or the first month is free.

This is not a science experiment.

456k

Autonomous coding agents have already authored 456,000 pull requests across 61,000 repositories and 47,000 developers. The model class is proven at scale. Owl applies it to your workflow. Source: arxiv SE 3.0.

Isolated. Scoped. Portable. Yours.

Runs on its own server with access only to the job.

Cancel any time, no contract, no exit fee. The work and the setup travel with you.

Book the call. Watch it work.

48h

From scoping call to running workflow. Your first non-human employee, live in 48 hours. Book at beacons.ai/humanarchitect. Operated by Human Architect.
