

Sell it under your name.

Turn a cost you
carry into a
revenue line.
Single tier. No
recruitment.

Your brand. Our engine.

Your clients see your name, not ours. The Non-Human Intelligence works under your label while we build, host, and run it. One clean option, nothing else to buy.

No recruitment. No payroll.

White-label is single tier. You add an AI employee to your offer without hiring, training, or managing anyone. A product on your shelf, not a line on your cost sheet.

Recurring revenue, not overhead.

You bill your clients monthly
for an Owl you deliver through
us. They pay you. We run it.
The margin is yours and it
renews.

One call builds the instance.

Book a scoping call at beacons.ai/humanarchitect. We stand up a white-label instance on your brand, live in 48 hours.
